

StockTrim API Bill of Materials

<https://api.stocktrim.com/api/boms>

POST – Add a BOM

Required Post Body JSON:

ProductId	String	The product Id of the built product. Must match the ProductId of an existing product.
ComponentId	String	The product id of the component product. Must match the ProductId of an existing product, and not be the same as the ProductId. Please also don't include circular references in your BOM hierarchy, since this will make the forecasts inaccurate.
Quantity	Decimal	The quantity of components used in the built product

Example

```
{  
  "productId": "ABC123",  
  "componentId": "BCA321",  
  "quantity": 15.0  
}
```

GET – Read BOM

<https://api.stocktrim.com/api/boms?productId={productId}&componentId={componentId}>

Example: <https://api.stocktrim.com/api/boms?productId=ABC123&componentId=BCA321>

Returns the BOM for a specified product and component. See Swagger sandbox for example.

DELETE – Delete BOM

<https://api.stocktrim.com/api/boms?productId={productId}&componentId={componentId}>

Example: <https://api.stocktrim.com/api/boms?productId=ABC123&componentId=BCA321>

Deletes the BOM for a specified product and component.
